

# JN Bentley

## civil engineering and construction

JN Bentley is a leading, privately owned construction company in the UK, directly employing over 600 people. We have an annual turnover now in the region of £100 million, generated from projects in both the building and civil engineering markets.

Our head office is Skipton (North Yorkshire) and we also have offices in Shifnal (Shropshire), Durham, Leeds, Edinburgh and Cambridge.

Our work spans a wide number of sectors: aerospace, commercial, environment, health and education, highways, renewable energy, solid waste, and water and wastewater.

Our business has grown largely from repeat work and long standing clients of the company include water companies, public sector bodies, energy companies, blue-chip commercial clients and educational institutions.

Our Industrial Placement Scheme is in its 12th year, and has led to the sponsorship of several students who have returned to work for us as graduates.

For 2012, we are offering placements in our Skipton, Shifnal, Leeds and Durham offices across the following business areas: Human Resources; Plant Control; Buying; Quantity Surveying; Civil Engineering; and Mechanical & Electrical Engineering.

# mechanical & electrical engineering placement

JN Bentley is offering the opportunity to gain valuable experience and develop a number of key skills that will help you to pursue a future career in M&E engineering.

The ability to work in an office under pressure whilst maintaining a sense of humour is essential for the role. You must be confident and motivated and be able to handle multiple tasks, portraying a strong work ethic and high-level of customer service. Good communication skills, an understanding of engineering practices, basic IT skills and the ability to work both in a team and independently are also essential, with commercial awareness and a knowledge of Lotus Notes desirable.

### the role

M&E Engineer

### location

Durham

### placement start date

Summer 2012 (flexible)

### duration

12 months

### holiday

26 days (plus public holidays)

### salary

£12,000 - 14,000

### closing date

Friday 27th Jan 2012

The role of an M&E engineer can vary between site and office based roles depending on the experience you would like - we can explore this at the interview stage.

### responsibilities

- Problem feasibility and problem definition / design output.
- Liaising with subcontractors and suppliers.
- Confirmation and approval of subcontractor drawings and designs.
- Overseeing suppliers and subcontractors on site based activity.
- Assisting with the production of estimates and costs.
- Undertaking site based commissioning.

Students must be studying a full time degree in electrical / mechanical / instrumentation and control engineering or a similar discipline and be eligible to work in the UK.

If you think this placement is for you then please send your CV and a covering letter to:
